

A scatter plot illustrating a negative correlation between Life Expectancy (x-axis) and an unlabeled variable (y-axis). The x-axis is labeled 'Life Expectancy' and has major tick marks at 60, 70, and 80. The y-axis is unlabeled. A solid blue line represents the linear regression, showing a clear downward trend. The data points are represented by small grey circles, scattered around the regression line. The plot includes a light grey grid.
